Professional Healthcare and Regulation

Professional Discipline

Court of Protection

Personal Injury

Clinical Negligence

Inquests

Civil and Insurance Fraud

Travel

GMC Defence

Contempt & Private Prosecutions

Mark Bradley has a significant healthcare practice. He specialises in Professional Discipline and Regulation, Coroner's Inquests, Court of Protection, Clinical Negligence and Personal Injury.

He has considerable experience of advising and representing healthcare professionals in General Dental Council and General Medical Council proceedings.

### Inquests

Mark appears at inquests on behalf of families, local authorities, insurers and other interested parties.

He recognises that early, and skilled, involvement ensures that legal issues such as disclosure, representation, contact with the Coroner, expert evidence and legal arguments are all dealt with in a timely fashion, all of which may have a significant impact on the course and outcome of inquest proceedings.

Mark appears in the High Court instructed by the Official Solicitor, in cases involving the requirement for urgent medical treatment in persons with learning disabilities, and disputed capacity to consent to such medical treatment.

### Court of Protection

He also regularly appears in the Court of Protection on behalf of local authorities, in cases involving welfare issues, including contact and capacity to consent to sexual relations.

## Clinical Negligence

Mark has developed his Clinical Negligence practice alongside his Coronial Law practice, advising on claims involving a wide range of medical issues.

He undertakes all aspects of personal injury work from fast-track trials to High Court applications.  
Mark accepts work under conditional fee agreements.

## Notable Cases

**Mark Bradley represented the family of an 18 year old girl who tragically died two weeks after receiving her first Covid-19 'jab'.**

### Practice Area: Inquest

The deceased, an 18 year old student paramedic, died two weeks after receiving the Astra Zeneca Covid-19 vaccination, having received the vaccine early due to being a 'front line worker'.

A narrative conclusion was provided by the Coroner who recorded the cause of death as being cerebral venous thrombosis brought on by Vaccine Induced Thrombocytopenia and Thrombosis (VITT) as a result of the Astra Zeneca Covid-19 vaccination.

The Coroner confirmed there was a missed opportunity to identify the cerebral venous thrombosis.
